By understanding, reinforcing, and modeling the innovator's DNA, companies can find ways to more successfully develop the creative spark in everyone. A version of this article appeared in the ... American teens have an in-depth understanding of climate change. For comparison, the same 75 questions were used to grade American adults. On this scale, 30 percent of adults received a passing grade. This "grade", however, should be interpreted with caution. Some questions clearly were harder to answer than others. participant observation, in-depth interviews, and focus groups. Each method is particularly suited for obtaining a specific type of data. • Participant observationis appropriate for collecting data on naturally occurring behaviors in their usual contexts. • In-depth interviewsare optimal for collecting data on individuals' personal ...
