i'd read this years before the book of *the silence of the lambs* came out and led to the excellent film adaptation that skyrocketed hannibal to the top of pop culture villains. hell, i'm so hannibal-hip that i'd caught brian cox playing him in michael mann's adaptation *manhunter*, and i didn't just see it on vhs like all the other late-comers, i actually saw it in the theater. twice! (i'm pretty sure this is the literary equivalent of claiming to have seen a band in a bar with eleven other people long before their first record deal.)

so after thomas harris and hollywood ran the character into the ground after the second movie, it's been years of shaking my head and saying, "man, nothing's been the same since anthony hopkins gave his oscar acceptance speech."

since i felt like harris was just cashing in and had pretty much ruined hannibal in the process, i hadn't felt the urge to revisit *red dragon* or *the silence of the lambs* in some time. i was more than skeptical about the nbc prequel tv series *hannibal*, but great reviews and the involvement of bryan fuller got me to check it out. not only has it been incredibly good and returned hannibal lecter to his creepy best, it's clever use of events referenced as backstory in *red dragon* had me digging out my copy to refresh my memory. even better, the show has given me a new appreciation for an old favorite and reminded me what i found compelling about it to begin with.

will graham was a profiler for the fbi until he was badly injured while identifying a certain gourmet serial killer whose name conveniently rhymes with 'cannibal' which certainly made life easier for the people writing tabloid headlines. will has retired to a happy new life with a wife and stepson in florida until his old boss jack crawford comes calling and asks for help. there's a brutal new killer dubbed the tooth fairy by the cops due to his habit of biting his victims. he's killed two families after breaking into their homes and seems to be on schedule to do it again at the next full moon.

will is reluctant to come back not just because he's already been gutted once by a madman. he also fears that trying to think like a mass murderer isn't the best thing for his mental health. it turns out that his concerns are justified after a tabloid journalist essentially paints a target on his back for the

know so much about them? what about the blood patterns, trajectory, etc? being inside will's head, seeing what he's seeing, was unequivocally, disturbing. and where's jack: the leeds dog? what do the two families, have in common? - the list goes on.

by working the scene, he learns a lot about the leeds' family. the first family, to be slaughtered, the jacobis - a month earlier, is a different matter. there isn't much left of that crime scene, after it was cleaned up. he needs to know them, as well.

we also get the killers' pov, as well as flashbacks to when he was younger, which was strangely, amusing. especially, when he gets a visitor, and he's able to tell that person his name - and that's only because the other children at the orphanage, kept calling him it. and it's got no 's' in it. i was a little disappointed that there was little time spent with lecter. we don't get to see his inner thoughts. well, that's probably for the best. i think.

so, this is the novel that spawned the movie, manhunter (1986), starring william peterson (will graham), brian cox (hannibal lecter), tom noonan (francis dolarhyde) joan allen (reba mcclane. she spent time at the new york institute for the blind - in preparation for her role, walking around blindfolded), stephen lang (freddy lounds), dennis farina (jack crawford) and kim greist (molly graham).

it's impressive, how close the movie is to the source material; including some of the dialogue. the ending was notably, different. obviously, they couldn't squeeze everything into the film. manhunter was going to be called red. not sure how close the red dragon movie, resembles the book, as i can't remember squat about it, for some reason. i'll probably watch it again, someday.

red dragon (2002), starred edward norton (will graham), anthony hopkins (hannibal lecter), ralph fiennes (francis dolarhyde), philip seymour hoffman (freddy lounds), harvey keitel (jack crawford) and mary-louise parker as molly graham.

personally, i preferred michael mann's 1986 movie adaption (i'll never forget the wheelchair scene.), which had a budget of \$15 million and took \$8.6 million at the box office. in contrast, brett ratner's red dragon (which is basically a remake), had a budget of \$78 million and took \$209.1 million at the box office.

the chronological order of the movies is: manhunter (1986), or red dragon (2002), the silence of the lambs (1991), hannibal (2001) and hannibal rising (2007). i still need to watch that one. jody foster didn't reprise her role as clarice starling in hannibal, as she didn't believe, she would have much of a part - wasn't worth her participation - and she wanted to direct the movie (amongst other things), so julianne moore, took over.

the inspiration for hannibal lecter, is based on a real-life person (who wasn't a serial killer), alfredo balli treviñi, who was a mexican doctor. the authors' foreword, provides more insight - foreword to a fatal interview.

i guess i'll have to read these in chronological order. i loved the silence of the lambs film - watched it a multitude of times - and anthony hopkins was quintessentially cast as psychiatrist/serial killer, hannibal lecter. brian cox's role as lecter was very good, as well. ...more flag 134 likes · like · see review view all 28 comments apr 06, 2018 david putnam rated it it was amazing · review of another edition loved this book. this book is vivid and very memorable. it precedes silence of the lambs, (another great read). a movie, manhunter was based on this book. michael mann directed (love mann movies). its a great movie but the book, as always, was better. the point of view of the antagonist was beautifully realized and that's what made the book so chilling. the chase of the antagonist--the hunt kept me reading long into the night. the way harris slowly layered in the clues was brilliant. the method in how the antagonist chose his victims was also a great concept. a solid five stars.

red dragon first brings us this character after being caught by fbi profiler, will graham. dr. lecter is living in isolation while in prison and will graham needs his help. another serial killer is on the loose and graham must go confront lecter to get help understanding this new threat.

the tooth fairy has killed two families so far when jack crawford asks for will graham's help. graham is hesitant to help due to catching two serial killers (one was dr. lecter) and graham is not sure his sanity and soul can survive these monsters. graham is one of the best fbi profilers out there and crawford knows he needs graham's help to catch this sadistic killer.

the tooth fairy aka red dragon is an evil and tormented monster. *harris* ends up getting into the background and mind of this character, and it's a twisted nightmare.

red dragon is intense, suspenseful and the psychology involved is unnerving. there were moments while reading that i was glad the lights were on. *thomas harris* seems to tap into the serial killer mind and creep the fuck out of you. no joke.

the characterization along with the heart stopping chase of stopping the red dragon was excellent. i also enjoyed all the forensics involved in the book.

i'm glad i finally read **red dragon!** *harris* seems to be one of the first to write about serial killers and he did an outstanding job.

should you read **red dragon** if you've seen the movies, **manhunter** or **red dragon**? yes, i think so. both movies were good, but this book taps into the psychology of the serial killer that i found was missing in the movies.

this book has a brilliant way of illustrating graham's past as he seeks the "tooth fairy" (an early moniker given to the red dragon). it feels almost as if you're reading a second book in a series, but not at all as if you'd missed reading the first. the brief moments spent here with hannibal are intense and revealing. it's completely possible that i would feel differently about who lecter is if i hadn't already known him from the silence of the lambs movie, but that's kind of like hearsay. a link is formed between lecter and the dragon, with will in the middle, and then the spotlight smartly transitions to our new killer. spending too much time with hannibal would have been a mistake. it was right about this point that he surprises me by snatching *lounds* (literally biting his lips off) and then returning him by a fiery fate. *note: the book has some sickly, gruesome moments, but it is so well done.* through the midst of this, the reader is treated to the killer's childhood and tutelage, so to speak. understanding dolarhyde's past and what he becomes does not make you like or identify with him (cause he's a crazed killer), but it serves in broadening the entire experience. three-dimensions is the key to this and many stories, and i loved it.

a quick aside in my review. i actually held red dragon in my hands as a very young teen in 1981. this may have been the second or third book i'd received after joining a book club, and i had probably read the first three or four chapters before stopping (graham inside the first victim's home was still clear to me). was i too young for the killer-thriller genre, and my first crime novel? i don't know. i had read cujo by that point in time, but i guess that's somewhat different, and it's possible that this story was all too real for me at that point. anyway, it's a memory i have.

i'd be remiss by not mentioning how strong and well-written the character of will graham is here. i don't believe i'll see him after this and will miss him. as far as my rating, even though i'm not certain how much i liked what feels like a movie style ending, red dragon is far too good to receive anything but 5 stars. ...more flag 84 likes · like · see review view all 22 comments may 31, 2019 jess?? rated it it was amazing · review of another edition red dragon by thomas harris is the first in the hannibal lecter series. my god what a creepy start it is.

and you won't find a badder guy than dr. hannibal lecter, since he isn't just a psychopath, but he's a psychiatrist, therefore he knows all the tricks that criminal profilers do, and he knows all the tricks of the psychologists whom try to treat him...

...oh, and if that wasn't enough...

...he eats his victims, with the best cuisine techniques!

how, will graham, special investigator of the fbi was able to catch him?

that's where things got creepy...

...since will graham thinks too much alike as lecter.

to catch a madman, you need a madman.

and the worse of that?

when the madman needs the help of the other madman.

that's where things get creepier...

...and bloodier!!!

evil knows evil

will graham got three dangerous serial killers, including the infamous dr. hannibal lecter...

...but at a great cost...

...so he decided to leave all that behind and having a quiet life with his family.

but evil never takes vacations...

...the tooth fairy, a new and twisted serial killer rises and entire families are paying the price.

special agent jack crawford, in charge of the behavioral science unit of the fbi, knows that the tooth fairy not only is something out of the regular serial killers, but also it's on a bloody spree, so there's little time to avoid more massacres...

...so he needs to call again will graham.

nobody can get into the minds of serial killers like graham.

however, since the tooth fairy is a menace racing against time...

...will graham needs to get into contact of dr. hannibal lecter to ask for his help in the case...

...the game is on again...

...and dr. hannibal lecter enjoys to play!

but nooo! jack crawford, will's former boss, shows up at his house asking for help on a new case of a new serial killer dubbed the tooth fairy, because the creep likes to bite his victims.

here's how the conversation goes between the two, broken down to its simplest form.

jack: hey i need your help with a case because you're the best at what you do.
will: but i don't want to on account i was nearly gutted last time i helped you.
jack: but you're really good at your job.
will: okay.....since you put it that way, i'll help.

francis dolarhyde, or the tooth fairy/the dragon, had a pretty awful childhood (to put it mildly.) born to a mother who rejects him because of a deformity, a hare lip, then raised by a sadistic grandmother who adopts him for the sole purpose to get revenge on her daughter (not because she loves the boy). as a result of growing devoid of all love, he turns out a little off. surprise!!

where dolarhyde has no empathy, will has too much. this is what makes him a good profiler; he is able to almost 'become' the person he is hunting, to understand them.

"graham had a lot of trouble with taste. often his thoughts were not tasty. there were no effective partitions in his mind. what he saw and learned touched everything else he knew. some of the combinations were hard to live with. but he could not anticipate them, could not block and repress. his learned values of decency and propriety tagged along, shocked at his associations, appalled at his dreams; sorry that in the bone arena of his skull there were no forts for what he loved. his associations came at the speed of light. his value judgments were at the pace of a responsive reading. they could never keep up and direct his thinking. he viewed his own mentality as grotesque but useful, like a chair made of antlers. there was nothing he could do about it."

that's pretty dark stuff to deal with and still fight to maintain sanity.

when all was said and done i suppose i 'enjoyed' this book. but yet i didn't enjoy it at all. it was very well done.....it kept my attention throughout, but i don't think this type of book is all that good for me. while i love dark books, i seem to need them to be a bit fanciful.....not of the real world. all the stuff that happens in the real world is depressing enough, bombings, school shootings, and kids shooting other kids to death, i feel the need to escape from that.

books like this are just more of that. oddly enough though, i think the new tv show is fantastic.

i now am reading a book about the tao de ching (that has an unfortunate title) hoping it will clean up my brain.....

red dragon is the novel that introduced us to the iconic character hannibal lecter. the only problem i had with this book is there wasn't enough lecter. this book is fantastically written. i've read other reviews that disliked the tooth fairy(i'm calling him that because he would hate it) grandmother subplot but i like it when the villains background is fleshed out. i will let you know that i thought the book lost steam at the 300 page count but it finished strong.

p.s. if you get a chance google the new york times reviews of the book written by christopher lehmann, its a weird a different take on book. apparently he felt the author is making fun of liberals and doesn't take childhood trauma serious. its a funny read.

i would recommend red dragon to fans of the movie the silence of the lambs and readers who love a twisted villain. ...more flag 54 likes · like · see review view all 8 comments apr 10, 2019 ken rated it it was amazing · review of another edition for some unbeknown reason i'd never gotten around to reading this series.

perhaps i should mention, in respect to this book, that i had already seen (and loved) the movie many times, but nevertheless i was quite immersed in the story anyway. so that's my rating: not the greatest novel, not particularly memorable, but rather good fun nonetheless.

belated postscript from 2021:

i'm not sure how this is the most popular review of mine of goodreads - i am just a modest user with less than 60 friends, but i've written many far better than this - but there you go. i ain't gonna complain. i thought i would just add, however, that having also read the next two books, though not yet *hannibal rising* (which i've heard is pretty terrible), *the silence of the lambs* is better than this one. as for *hannibal*, i'm not really sure. like the movie, it's easily the most messed up, but it has its strong moments. i can't really deal with the film anymore though, since for some reason what used to be seen as objectively disgusting and quite off-putting about some of hannibal's baser acts (feeding a man his own brains and all that) are now held up as somehow hilarious. maybe the show has something to do with that. i always liked it better when hannibal was reluctantly respected and kind of admired from a safe distance, not gleefully applauded.

i think the mark of how great his ideas are is that they almost always make a compelling transfer to the screen, and red dragon has made that transition twice: once as michael mann's manhunter and once as the more faithful red dragon. each film provides a different take on harris' most famous character, hannibal lecturer, both films provide a chilling effect on the viewer's emotions, and both films offer up a frightening -- though very different -- francis dolarhyde.

harris' writing is cinematic in structure and quality, making his books easy to transfer to the screen. characters, settings and even action can be dropped or rolled into others or completely altered without harming the telling of the tale. much of this is about the mood harris creates. there is an underlying suspense and oppression in his books that gives a screen writer or director a sound compass for adaptation, allowing him/her to do justice to a harris book by maintaining the spirit of the story -- no matter what changes are required by the shift to cinema.

still, as a novel red dragon is merely enjoyable. a rather twisted and macabre diversion, but a diversion nonetheless. it is one of those late night, make you uncomfortable reads, or a dreary, rainy, wish you were at the beach reads.

i was initially disappointed to find that hannibal did not feature more prominently inside this book. when he did feature, interactions were brief yet chilling, and displayed his astute process for fact-finding and the workings of his extraordinary mind. when he did not feature, he still did so, but only as the ever-present specter that haunted will's mind. it left me longing for more, a desire i'm sure the rest of the series will satiate.

the red dragon was also provided with a perspective, something i usually dislike in crime fiction. his mind was just as chilling one to enter and his details of his numerous crimes left me feeling sickened.

the downfall of this novel, for me, came largely from the conclusion. will graham was coming ever closer to solving the puzzling presence of the man behind the red dragon's mask and just before he was able to do so something occurs which makes it known for him. i really wanted him to come to this conclusion himself and was disappointed to see this not be the case. a plot twist followed, however, that took me wholly by surprise and ensured i closed the book with almost entirely positive appraisal and eager to continue on with the series. ...more flag 48 likes · like · see review nov 19, 2017 cody | codysbookshelf rated it it was amazing shelves: favorites like a poisonous snake on the attack, this novel bites again and again and again, leaving its victim shaken and disturbed. i am somehow one of the only people in the known universe who had never read anything by thomas harris — i've remedied that, and am now moving on to this book's follow-up, *silence of the lambs*.

this is a solid entry to the series with a strong protagonist facing a strong antagonist. i usually don't enjoy detective stories but this was well written and with interesting fleshed-out characters. my favorite part was in the middle, where we get to see about the childhood of the red dragon or the tooth fairy as they call the serial killer at the beginning of the story. i felt very sorry for him as a child. the story indirectly tells you that sometimes a toxic family or society can create a monster out of a person. this kind of book needs the right atmosphere and fortunately, it had it! it is chilling and scary, to say the least. there is a lot of tension building that will definitely make you be at the edge of your seat.
